The nutritional information is comprised of data from an independent testing facility commissioned by Dave & Buster's, combined with nutrient data obtained from our suppliers. We will update this information periodically with the introduction of each new menu.

We strive to provide accurate and complete nutritional information. Some menu items may not be in all restaurants, including but not limited to test products, test recipes, limited-time offers or regional items. While menu item ingredient information is based on standard product recipes, variations may occur due to ordinary differences inherent in the preparation of menu items, local suppliers, region of the country and season of the year. Modifications and substitutions will also impact the nutritional information detailed in this document.

A 2,000 calorie diet is used as the basis for general nutrition advice. However, individual calorie needs may vary.

1,200 to 1,400 calories a day is used for general nutrition advice for children ages 4 to 8 years old and 1,400 to 2,000 calories a day for children ages 9 to 13, but calorie needs vary.
